
Gennum Wins Canadian Chamber of Commerce Canada-Japan Award

Burlington, Ontario (November 1, 2004) – Gennum Corporation (TSX: GND), a provider of silicon integrated circuits (ICs) and hybrid circuits for the video, hearing instrument and data communications markets, is pleased to announce that its wholly-owned subsidiary, Gennum Japan Kabushiki Kaisha, was selected by the Canadian Chamber of Commerce in Japan (CCCJ) as the recipient of the Entrepreneurship/SME Award.

This Award is presented to recognize an individual or small/medium-sized enterprise who, driven by the spirit of entrepreneurship, has successfully brought products (including services) to market. Gennum played an integral role in the evolution of high-definition television in Japan by developing transport and image processing products that enable the routing, transfer and display of high-definition video with the broadcast studio and post-production houses.

The award was presented by the Canadian Chamber of Commerce on October 27th in Tokyo at a special dinner hosted at the ambassador's official residence. The Canada-Japan Business Awards, sponsored by the CCCJ, honour achievement in strengthening the commercial/economic bond between Canada and Japan.

About Gennum
